

*Embassy of the United States of America*

May 1, 1995

**LETTER OF RECOMMENDATION**

To Whom it May Concern;

The US Embassy in Tel Aviv is going through a major renovation. Lev D.A. Project Ltd. has been associated with this project for the last 18 months, and before that they worked for us in another US Embassy project in Kfar Shmaryahu.

Their work, mostly in iron and steel members, has been exceptional. They have installed more than 200 tons of steel in the building and are also responsible for installing heavy ballistic doors and windows.

They are very meticulous in their work and I highly recommend them for future work.

Sincerely,

A handwritten signature in black ink, appearing to read "Sonny Masson", with a long horizontal line extending to the right.

Sonny Masson - PD  
American Embassy - FBO  
71 Hayarkon Street  
Tel Aviv, Israel
